

The DEHN logo is located in the top right corner of the image. It consists of the word "DEHN" in a bold, white, sans-serif font, flanked by two white lightning bolt symbols pointing outwards.

DEHNcare ArcFit Indoor and Outdoor

We take your protection seriously.

More individuality for your company and your employees

Anybody working in high energy ranges must be especially well protected. True to our motto "We know, we care", we at DEHN are constantly working on solutions that minimise the risk of injury and accidents to your employees.

With DEHNcare ArcFit, the new textile protective clothing against arc faults, your employees won't just feel safe and well. Thanks to the integrated company logo, they become messengers for your brand.

Your configuration for an impressive appearance

Exclusively available from DEHN:

Decide for yourself what your protective clothing should look like

Benefit from the advantages of personalised protective clothing:

- Uniform external image of your company
- Visually professional appearance
- Your employees become brand ambassadors

- Extremely individual clothing thanks to your chosen colour combination, your own logo and the employee's name
- Trousers and jacket can be customised separately
- Uncomplicated quotation request via our form

Configure

Choose between different colours for the desired combination of fabrics and zippers.

Integrate the logo

Place your company logo on jackets and trousers. You can choose between five different positions.

Personalise

Add the name of your employee to the protective jacket. This adds a more personal touch to your personal protective equipment against the thermal effects of an electric fault arc.

Always the right choice:
Protective clothing, protective gloves, face shield and safety helmet – all at an attractive price

PPE against arc faults electrician set:
All your PPE in one grab

We focus on your protection

Take advantage of the benefits of our resistant protective clothing

Like all DEHNcare products, the new DEHNcare ArcFit also meets the required standards for working on electrical installations. It was developed to protect the wearer against

the thermal effects of an arc fault– when worn in combination with the matching accessories. In addition to an indoor collection, we also offer an outdoor collection.

Indoor

- Corresponds to arc flash protection class APC 2 (ELIM = 13 cal/cm²)
- Boasts electrostatically dissipative properties
- Safety through visibility
Additional reflectors increase visibility even in poor light conditions

Outdoor

- Corresponds to arc flash protection class APC 2 (ELIM = 13 cal/cm²)
- Boasts electrostatically dissipative properties
- Jackets and trousers combined satisfy high-visibility class 3
- Protection against chemicals class 6 is also satisfied
- The protective clothing is water-repellent.

DEHNcare ArcFit protects you against the following:

IEC 61482-2 EN ISO 11612 EN ISO 11611 EN 1149-5 EN 17353

IEC 61482-2 EN ISO 11612 EN ISO 11611 EN 1149-5 EN ISO 20471 EN 13034

Your comfort all day long

Take advantage of protective clothing characterised by both comfort and practicality

So your employees can feel good throughout the whole day, we have carefully conceived our new protective clothing DEHNcare ArcFit from head to toe and have left nothing to chance. It is important to us that the jacket and trousers are made of the same material – and both are comfortable to wear.

DEHNcare ArcFit – protection down to the finest detail
